2019 Symposium on Nuclear Data 2019□□□□□□□□□□

Thursday 28 November 2019

Poster Session □□□□□□□□□□ - 3□□□□ (15:30-17:00)

□□□□□□□□□□□□□□□□□□□□□□□□

title	presenter	board
Production cross sections of ${}^{45}\text{Ti}$ via deuteron-induced reaction on ${}^{45}\text{Sc}$	TSOODOL, Zolbadral	1
Production of ${}^{169}\text{Yb}$ by the proton-induced reaction on ${}^{169}\text{Tm}$	AIKAWA, Masayuki	2
Proton-induced reactions of ${}^{93}\text{Zr}$ using the OEDO beamline	HWANG, Jongwon	3
Measurements of nuclear cross section data for proton-induced reactions on Bi and Pb targets at intermediate energy	BAKHTIARI, Mahdi	4
Measurement of nuclide production cross sections for $Z = 26-30$ elements irradiated with 0.4 - 3.0 GeV proton in J-PARC	IWAMOTO, Hiroki	5
Study of an angular correlation of γ -rays emitted by ${}^{117}\text{Sn}(n,\gamma)$ reactions for T-violation search	KOGA, Jun	6
Measurement of γ ray angular distribution to come from 4.53 eV p-wave resonance of ${}^{111}\text{Cd}$ in compound nuclear reaction	MAKISE, SO	7
Measurement of photon strength function in In-115 at gELBE facility	MAKINAGA, Ayano	8
Comparison between experimental and calculation neutron spectra of the ${}^{197}\text{Au}(\gamma,n)$ reaction for 17 MeV polarized photon	TRAN, Kim Tuyet	9
Measurement of total neutron cross section of Niobium at J-PARC MLF ANNRI	ENDO, Shunsuke	10
High-Energy Measurement of the Neutron Capture Cross Section of ${}^{237}\text{Np}$	ROVIRA LEVERONI, Gerard	11
New Methods to Reduce Systematic Uncertainties of Capture Cross Section Measurement Using a Sample Rotation System	KODAMA, Yu	12
Proton Spectra with Low-Energy-Threshold from 40- and 70-MeV Proton-Induced Reactions	YAMAGUCHI, Yuji	13
Charged particle emission reactions induced by 100-MeV/u ${}^{12}\text{C}$ ions	YOSHIDA, Kazuhito	14
Neutron Production Double-differential cross section from Carbon and Niobium targets bombarded with 290 MeV/u ${}^{136}\text{Xe}$ ions	MOON, Dalho	15
Measurement of Neutron Energy Spectra of 345 MeV/u ${}^{238}\text{U}$ Incidence on a Cu Target	SUGIHARA, Kenta	16
Measurement of the energy spectra of hydrogen isotopes from nuclear muon capture in natSi	MANABE, Seiya	17
Detailed examination of benchmark experimental method for large angle scattering reaction cross section at 14MeV for a flake target	FUKUI, Kazuki	18
Integration test with a Gaseous Detector and a Solenoidal Magnet for the Precise Neutron Lifetime Measurement	YANO, Kodai	19
HUNS upgrade; Simulation of the beam profile for a thermal neutron source in HUNS-2	HARA, Kaoru	20

Preliminary experiment on characterization of RANS-II neutron production via the ${}^7\text{Li}(p, n){}^7\text{Be}$ reaction with 2.49 MeV proton injection	IZUMITANI, Shogo	21
Development of a neutron beam monitor for nuclear data measurement using spallation neutron source	NAKANO, Hideto	22
Model analysis of isotope-production cross sections for proton- and deuteron-induced reactions on Zr-93	NAKANO, Keita	23
Dependence of the potential energy surface of U-236 system on effective nucleon-nucleon interactions	FUJIO, Kazuki	24
Fission study using four-dimensional Langevin model - Nuclear shape of fission fragments	ZHANG, Xuan	25
Systematical calculation of probabilities of beta-delayed neutron emission and fission in the entire region of nuclear chart	KOURA, Hiroyuki	26
Estimation of covariance of the neutron cross section of the long-lived fission product	INAKURA, Tsunenori	27
Estimation of Covariance of Neutron Cross Sections for Decommissioning	AMITANI, Tatsuki	28
Development of multi-group neutron activation cross-section library from JENDL/AD-2017	KONNO, Chikara	29
Quantification of Integral Data Effectiveness Using the Concept of Active Sub-Space in Nuclear Data Testing	CHIBA, Go	30
Uncertainty estimation of conventional neutron-spectrum unfolding codes with Monte Carlo based method	AOKI, Katsumi	31
The Influence of B Burnable poison and T Production Li rod on Effective Multiplication Factor in the HTGR	KOGA, Yuki	32
Evaluation of radioactive concentration produced in electric equipments and materials on the decommissioning of nuclear power plants	YAMANISHI, Hirokuni	33
Evaluation of scattered radiation on the contralateral breast in breast-conserving therapy	HARA, Rikuto MAKINAGA, Ayano	34
Burnup calculation with different fission yield data	KITADA, Takanori	35
Improvement of fuel ion ratio diagnostics performance using anisotropic neutron emission spectrum in NBI heating deuterium-tritium plasma	URAKAWA, Tomoki	36
